## KML-FILE

- **Keyhole Markup Language**
- Kmz = zipped kml
- For AFLUX and MOSAiC-ACA campaigns
- To be found: in Flight Logs of wikis or  
/projekt\_agmwend/data/AFLUX/AFLUX.kmz  
/projekt\_agmwend/data/MOSAiC\_ACA\_S/MOSAiC-ACA.kmz

Layers

An aerial photograph showing the wing of an aircraft flying over a vast, textured layer of white clouds. The sun is visible in the upper left, creating a bright lens flare and illuminating the scene. A large, semi-transparent red geometric shape, resembling a stylized 'V' or a large triangle, is overlaid on the right side of the image. The text 'GOPRO-VIDEO' is written in white, bold, sans-serif capital letters within the red area.

## SPECTRAL IMAGER DATA

### AisaEAGLE

- Imaging spectrometer
- 488 channels from **400 – 970 nm**
- FOV = 36° with 1024 pixels

### AisaHAWK

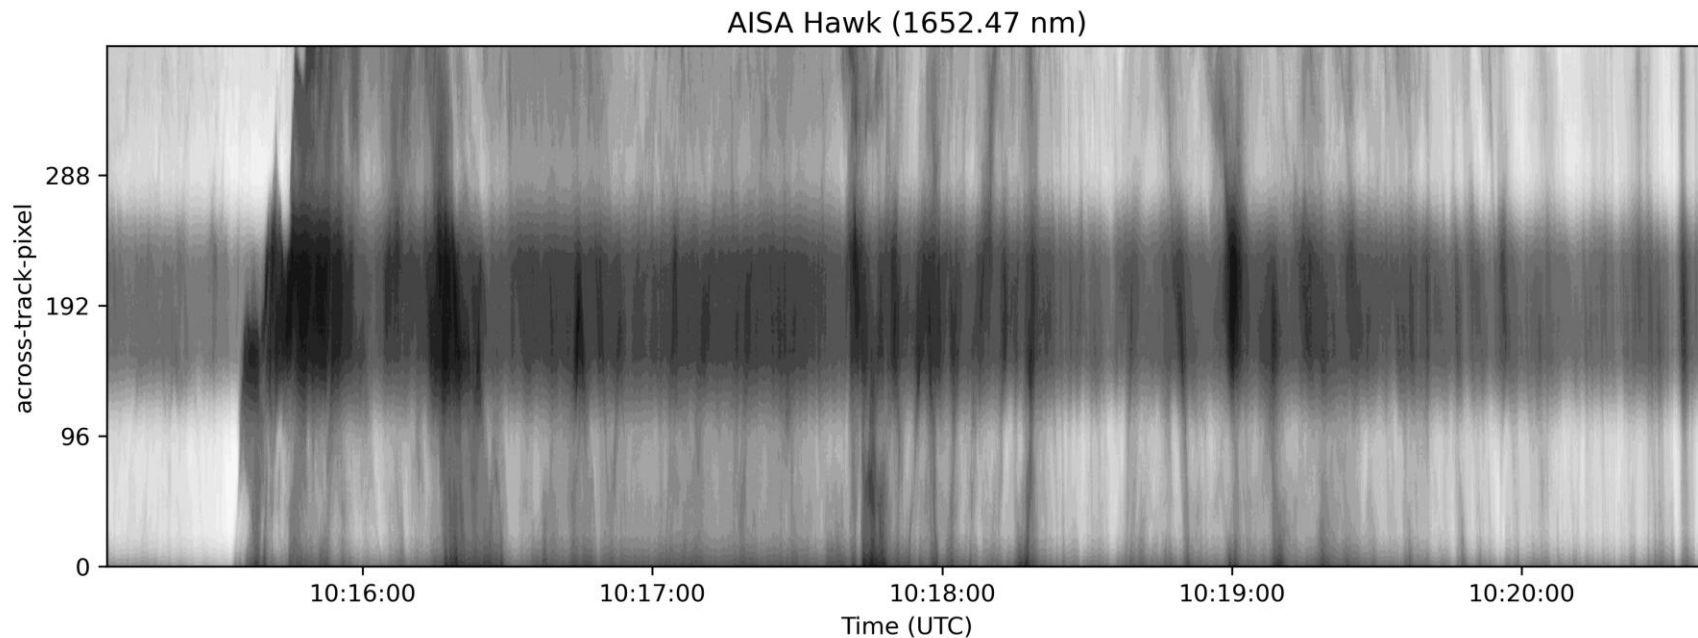

- Imaging spectrometer
- 254 channels from **970 – 2500 nm**
- FOV = 36° with 384 pixels

**Goal:**

- Combining datasets of AisaEAGLE and AisaHAWK
  - **full spectrum** in one netcdf-file
  - advantage: **easier** handling of data

## SUMMARY

# THANK YOU FOR YOUR ATTENTION!

- Kml-File is an interactive and comprehensive visualization tool
- GoPro-Video combines visual information of clouds with the location and altitude
- Combined datasets of AisaEAGLE and AisaHAWK allows easier access to full spectrum
